

TOGS Aircraft is an FAA-certificated repair station founded in 2003 and the maintenance arm of Sage-Popovich. We are expanding at Gary/Chicago International Airport, adding a second hangar in September 2026 to support business and regional aircraft across the Great Lakes.

The name started as "Tired Of Getting Screwed," our answer to the constant upselling operators see in the maintenance market. We do it straight: honest scope, honest rates, no surprises.

FULL-SERVICE CAPABILITIES

Scheduled & Heavy Maintenance

Airframe inspections and scheduled through heavy checks for fixed-wing aircraft and helicopters.

Instrument & Radio Ratings

FAR 91.411 altimeter and static system tests
FAR 91.413 ATC transponder tests and inspections

24/7 AOG Response & Quick-Turn Inspections

Fast coverage when an aircraft goes down near Chicagoland.

Hangar Space & Line Support

Room for transient and based aircraft as we expand.

Part Sales & Sourcing

Part sales from our temperature-controlled warehouse in Valparaiso, Indiana, with discount sourcing across more than 250,000 line items.

ADVANTAGES OF GARY/CHICAGO (GCIA)

- Avoids the congestion, delays, and high costs of other Chicagoland airports
- Just a 30 minute drive from downtown Chicago
- Easy repositioning, with U.S. Customs on the field
- Major airport investment underway: new ATC tower, expanded cargo ramp, and terminal upgrades
